PROFESSIONAL SUMMARY

Results-oriented Software Engineer with significant hands-on experience writing quality code using Java and working on large enterprise systems in the Financial Service industry, working on high-volume REST APIs receiving up to 16 billion requests per month.

SKILLS

Proficient: Java SE (8/11/17/21), IBM DB2 UDB, Oracle, JDBC, SpringBoot, GraphQL, Git, GitLab, IntelliJ IDEA, JUnit, Mockito
Familiar: Kafka, Apache Avro, Python 3, Kubernetes, OpenShift, Docker, Postman, Kibana, JIRA, AWS, Swagger, Confluence Wiki, Slack
Other: Software Design, REST APIs, Software Engineering, Troubleshooting, Mentoring, Agile, Site Reliability Engineering (SRE), and Production On-Call
Certifications: ISC2 CC

WORK EXPERIENCE

USAA | Software Engineer **June 2024 - present**
San Antonio, TX
● Contributed toward modernization efforts by engineering microservice based REST APIs using Spring boot, accelerating migration away from legacy systems and improving service performance and maintainability.
● Implemented GraphQL API enabling unified access to critical data for internal consumers, reducing data retrieval complexity and improving integration efficiency across the enterprise.
● Implemented batch end points for high-volume REST APIs to eliminate N+1 problem, lowering the latency by 50% and removing overload on downstream services and data sources.
● Automated re-sync of voyager-altair deployments for enterprise GraphQL, eliminating manual overload.
● Designed and developed a REST API in 2 months to reduce fraudulent activity resulting in saving the company over $4M per month.
● Significantly improved the team's codebase by adding 150+ unit tests, refactoring outdated logic in 4 different projects and removing 1000+ lines of unused code.
● Mentored two software engineering interns providing technical guidance, pair programming, and structured learning plans to accelerate team contribution.
● Participated in on-call rotations, ensuring service consistency and availability. Supported critical applications, totaling 20+ billion transactions per month.
● Collaborated within an Agile Scrum team to deliver iterative improvements, and new platform capabilities, contributing to spring planning, backlog refinement, and team demos.

Emerald Hills Institute | Software Developer Intern **November 2023 - May 2024**
Salt Lake City, UT
● Documented the overall IT design of the organization to find the pain points and rooms for improvements. End up saving the organization $250 per month in unused services.
● Automated multiple parts of the organization's website resulting in higher user interaction, and achieving a boost in website traffic through responsive design and improved SEO.
● Communicated the technical needs for the website to business partners, prioritizing critical changes and ensuring service availability.

EDUCATION

Bachelor of Science, Computer Science **May 2023**
University of Texas at San Antonio
GPA: 3.69
Honors: Dean's List 2021 and 2022, Honor Roll 2022 and 2023, National Science Foundation UTSA I-FOCUS-CS Scholarship 2023
